

Demonstration of Proposed Features

This document captures the proposed features of EduGenie and tracks whether each feature was successfully implemented and demonstrated. It provides evidence of the team's ability to deliver the planned AI-powered learning assistant for students.

Project Details

Project

Project Name: EduGenie: Google
Gemini Powered Learning Assistant

Team ID: SWTID-2026-3580

Date: 30 September 2026

Assessment

Maximum Marks: 1 Mark

Reviewers: Project evaluators and
academic reviewers

Branding

SmartBridge / SkillWallet

Placement preserved per reference
template

Demonstration Overview

This page documents the demonstration status for each proposed EduGenie feature. Each row lists the feature, a concise description, current implementation status, whether it was demonstrated, and remarks summarizing test evidence.

Feature Checklist

S.No	Feature Name	Description	Status	Demonstrated	Remarks
1	Student Q&A	Allows students to ask educational questions and receive AI-generated answers using the Gemini-powered backend.	Implemented	Yes	Tested through the EduGenie Q&A interface and FastAPI endpoint.
2	Concept Explanation	Explains difficult educational topics in a simpler and student-friendly manner.	Implemented	Yes	Tested using topic-based explanation requests.
3	Quiz Generation	Generates multiple-choice quizzes with questions and answer options based on a selected topic.	Implemented	Yes	Quiz generation and answer-checking functionality demonstrated.
4	Long-Passage Summarization	Converts lengthy educational text into a concise summary containing the important information.	Implemented	Yes	Tested using the summarization functionality.
5	Personalized Learning Path	Generates structured learning recommendations across beginner, intermediate and advanced levels.	Implemented	Yes	Learning-path recommendation endpoint and output demonstrated.
6	Web-Based Learning Interface	Provides a responsive HTML/CSS/JavaScript interface through which students can access all EduGenie learning features.	Implemented	Yes	Integrated with the FastAPI backend and tested locally.

Feature Implementation Summary

Metric	Value
Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%

Notes on Demonstration

The demonstration included live interactions with the EduGenie frontend, API endpoint calls to the FastAPI backend, and recorded sample outputs for each feature. All tests used the Gemini-powered model integration and representative educational prompts to validate correctness and student-facing quality.

Compliance and Academic Integrity

All outputs were reviewed for factual clarity, appropriate citation prompts, and avoidance of hallucinated claims in student-facing explanations. Implementation adheres to institutional guidelines for AI-assisted educational tools and privacy-preserving data handling during demonstrations.

How to Reproduce

1. Clone the EduGenie repository and install dependencies.
2. Start the FastAPI server and ensure Gemini API credentials are configured.
3. Open the web interface locally and exercise each feature end-to-end.
4. Refer to recorded logs and test cases for verification evidence.
