

Project Demo Planning

Date	30 September 2026
Team ID	SWTID-2026-3580
Project Name	EduGenie: Google Gemini Powered Learning Assistant
Project Demo Planning:	
A well-structured demo plan ensures that the EduGenie team presents the project clearly and effectively. The demonstration covers the problem addressed by EduGenie, the proposed AI-powered learning solution, major functional features, the live web interface, backend integration, and the overall project outcome.	

1	Introduction & Problem Statement	Introduce EduGenie, the student learning problem, project objective, and motivation for building an AI-powered learning assistant.	2	Aaladiyan V
2	Solution Overview	Explain the EduGenie architecture, FastAPI backend, web interface, Gemini integration, and overall request-to-response workflow.	3	Aaladiyan V
3	Core AI Features	Demonstrate Student Q&A, Concept Explanation, Quiz Generation, and Long-Passage Summarization.	4	Sundaravel T
4	Learning Path & Recommendations	Demonstrate structured learning recommendations for beginner, intermediate, and advanced levels.	2	Kodeeswaran S
5	Live Application Demonstration	Show the web interface, submit real requests, display AI-generated results, and demonstrate the working application.	4	Aaladiyan V
6	Testing, Results & Q&A	Present testing results, project outcome, limitations, future enhancements, and answer questions from the audience.	3	Kodeeswaran S

Demo Flow Summary:

1	Introduction & Problem Statement	Explain the student learning problem, project objective, and motivation behind EduGenie.
2	Solution Overview	Explain the architecture, technology stack, Gemini integration, FastAPI backend, and web interface.
3	Live Feature Demonstration	Demonstrate Q&A, concept explanation, quiz generation, summarization, and learning recommendations.
4	Q&A Session	Answer questions about implementation, AI integration, testing, limitations, and future enhancements.
