

Project Executable Files

Date	30 September 2026
Team ID	SWTID-2026-3580
Project Name	EduGenie: Google Gemini Powered Learning Assistant
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for the project. Files are organized so the evaluator can run the solution using the provided instructions.

Step 1: Submission Checklist

1	Complete source code (all files and folders)	Yes
2	README / Setup Guide	Yes
3	requirements.txt / dependency file	Yes
4	Database schema / seed files	NA - no database in current MVP
5	Environment configuration file	Yes - secret key not committed
6	Deployed application URL	NA - local submission
7	APK / Executable binary	NA - web application
8	Dockerfile / Containerization config	NA - not included
9	Test files and test results	Yes
10	Demo video or walkthrough	To be provided

Project Executable Files

Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for the project. Files are organized so the evaluator can run the solution using the provided instructions.

Step 2: File / Folder Structure

EduGenie repository structure:

main.py	FastAPI app, routes, validation, HTML rendering
gemini_client.py	Shared Google Gemini client configuration
qna.py	Question-and-answer module
explanation_module.py	Local LaMini-Flan-T5 explanation module
quiz_module.py	Quiz generation and JSON parsing
summary_module.py	Long-passage summarization
learning_path.py	Learning recommendations
templates/index.html	EduGenie web interface
static/style.css	Responsive styling
tests/test_api.py	FastAPI endpoint tests
tests/test_modules.py	Module-level tests
requirements.txt	Python dependencies
README.md	Setup and project documentation

Step 3: Deployment / Access Details

Hosted / Deployed URL	Not deployed; currently run locally.
Login Credentials (Demo)	Not required for current MVP.
Platform / Hosting Provider	Local Python + FastAPI + Uvicorn.
Repository Link	https://github.com/aladiyan33/EduGenie
Demo Video Link	To be added for final demonstration.

Project Executable Files

This section requires submission of all executable and deployable files for the project. Files are organized so the evaluator can run the solution using the provided instructions.

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run the project locally:

- 1
- Install Python 3.x and open a terminal in the EduGenie repository.
- 2
- Create and activate a virtual environment.
- 3
- Install dependencies: `python -m pip install -r requirements.txt`
- 4
- Create `.env` and set `GEMINI_API_KEY`; never commit the secret key.
- 5
- Start: `uvicorn main:app --reload`
- 6
- Open `http://127.0.0.1:8000` in a browser.
- 7
- Test Explain, Q&A, Quiz, Summary, and Learning Recommendations.

Step 5: Known Issues / Limitations

1	Gemini API needs a valid API key and internet access.	Configure <code>GEMINI_API_KEY</code> locally.
2	Performance metrics depend on the execution environment.	Run load tests before reporting numeric results.
3	LaMini-Flan-T5 requires PyTorch and sufficient resources.	Install dependencies and use local CPU/GPU.
